LUMIPLASTIA

Duration: up to 4 months
Service time: approximately 120 minutes

STEP 1

Divide the hair into 4 sections. Wear gloves. Apply **Kera Smoothing Cream** throughout lengths staying 1 cm away from the roots, working in 1 cm sections. Comb thoroughly to distribute the product evenly. Start from the back and finish with the two front sections.

STEP 2

Processing time: 60 minutes at room temperature or 30 minutes under a heat source with a cap.
After processing, wet the hair using a spray bottle. Massage lengths and rinse the entire head for 15–20 seconds to remove excess product.

STEP 3

Blow dry your hair completely and brush.

STEP 4

Flat iron each section (approx. 0.5 cm thick). Perform the correct number of passes based on hair type (see table).

STEP 5

Apply **Smoothing Shampoo** to wet hair. Rinse and repeat.

STEP 6

Apply **Glass Liquid Mask** on towel-dried hair and leave on for 5 minutes. Rinse thoroughly.

STEP 7

Blow-dry the hair directing the airflow from top to bottom. Flat iron 2 cm sections.

HAIR TYPE	STRAIGHTENER PASSES	STRAIGHTENER TEMPERATURE
Fine natural hair, bleached hair or with highlights	from 7 to 9	160°C / 180°C - 280°F / 320°F
Chemically colored hair	from 10 to 12	180°C / 200°C - 320°F / 370°F
Medium or coarse natural hair, resistant hair	from 12 to 18	200°C / 230°C - 400°F / 410°F

ON TONED HAIR, MIX PURE PURPLE AND KERA SMOOTHING TREATMENT IN 1:10 RATIO

WARNINGS: Follow instructions for use carefully. Wear suitable gloves. Do not apply on irritated or damaged scalp. Avoid contact of the product with eyes and skin. Rinse eyes and skin immediately if product comes into contact with them. If any adverse reaction occurs, stop use immediately and seek medical assistance. For external use only. Keep out of reach of children.

KERATIN SMOOTH TREATMENT

Duration: up to 4 months
Service time: approximately 120 minutes

STEP 1

Divide the hair into 4 sections. Wear gloves. Apply **Kera Smoothing Cream** throughout lengths staying 1 cm away from the roots, working in 1 cm sections. Comb thoroughly to distribute the product evenly. Start from the back and finish with the two front sections.

STEP 2

Processing time: 60 minutes at room temperature or 30 minutes under a heat source with a cap.
After processing, wet the hair using a spray bottle. Massage lengths and rinse the entire head for 15-20 seconds to remove excess product.

STEP 3

Blow dry your hair completely and brush.

STEP 4

Flat iron each strand (approx. 0.5 cm thick). Number of passes depends on hair type (see table).

STEP 5

Apply **Smoothing Shampoo** to wet hair. Rinse and repeat.

STEP 6

Apply **Smoothing Mask** on towel-dried hair and leave on for 5 minutes. Rinse thoroughly.

STEP 7

Blow-dry the hair directing airflow from top to bottom.

HAIR TYPE	STRAIGHTENER PASSES	STRAIGHTENER TEMPERATURE
Fine natural hair, bleached hair or with highlights	from 7 to 9	160°C / 180°C - 280°F / 320°F
Chemically colored hair	from 10 to 12	180°C / 200°C - 320°F / 370°F
Medium or coarse natural hair, resistant hair	from 12 to 18	200°C / 230°C - 400°F / 410°F

ON TONED HAIR, MIX PURE PURPLE AND KERA SMOOTING TREATMENT IN 1:10 RATIO

WARNINGS: Follow instructions for use carefully. Wear suitable gloves. Do not apply on irritated or damaged scalp. Avoid contact of the product with eyes and skin. Rinse eyes and skin immediately if product comes into contact with them. If any adverse reaction occurs, stop use immediately and seek medical assistance. For external use only. Keep out of reach of children.

ANTI-FRIZZ SMOOTH LAMINATION

Duration: 1 month
Service time: approximately 60 minutes

STEP 1

Divide hair into 4 sections. Wear gloves. Mix 30g of **Kera Smoothing Cream** + 30g of **Smoothing Mask** + 3 g **Nourishing Oil.** Apply on 2 cm sections staying 1 cm away from the roots. Comb thoroughly to distribute the product evenly. Start from the back and finish with the two front sections.

STEP 2

Processing time: 20 minutes at room temperature or 10 minutes under a heat source with a cap.
After processing, wet the hair using a spray bottle. Massage lengths and rinse the entire head for 15–20 seconds to remove excess product.

STEP 3

Blow dry your hair completely and brush.

STEP 4

Flat iron each strand (2 cm thick). Perform 2 to 4 flat iron passes, adjusting the temperature according to the hair type (see table).

STEP 5

Apply **Smoothing Shampoo** to wet hair. Rinse and repeat.

STEP 6

Apply **Glass Liquid Mask** on towel-dried hair and leave on for 5 minutes. Rinse thoroughly.

STEP 7

Blow-dry the hair directing the airflow from top to bottom. Flat iron 2 cm sections.

HAIR TYPE	STRAIGHTENER PASSES	STRAIGHTENER TEMPERATURE
Fine natural hair, bleached hair or with highlights	from 2 to 4	160°C / 180°C - 280°F / 320°F
Chemically colored hair	from 2 to 4	180°C / 200°C - 320°F / 370°F
Medium or coarse natural hair, resistant hair	from 2 to 4	200°C / 230°C - 400°F / 410°F

ON TONED HAIR, MIX PURE PURPLE AND KERA SMOOTING TREATMENT IN 1:10 RATIO

WARNINGS: Follow instructions for use carefully. Wear suitable gloves. Do not apply on irritated or damaged scalp. Avoid contact of the product with eyes and skin. Rinse eyes and skin immediately if product comes into contact with them. If any adverse reaction occurs, stop use immediately and seek medical assistance. For external use only. Keep out of reach of children.

ANTI-FRIZZ CURLY LAMINATION

Duration: 1 month
Service time: approximately 60 minutes

STEP 1

Divide hair into 4 sections. Wear gloves. Mix 30g of **Kera Smoothing Cream** + 30g of **Curly Mask** + 3g of **Curly Oil**. Apply along the entire length on 2 cm sections staying 1 cm from away from the roots. Comb thoroughly to distribute the product evenly. Start from the back and finish with the two front sections.

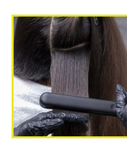

STEP 2

Processing time: 20 minutes at room temperature or 10 minutes under a heat source with a cap.
After processing, wet the hair using a spray bottle. Massage lengths and rinse the entire head for 15–20 seconds to remove excess product.

STEP 3

Blow dry your hair completely and brush.

STEP 4

Flat iron 2 cm sections performing 2 passes, adjusting temperature based on hair type (see table).

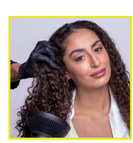

STEP 5

Apply **Curly Shampoo** to wet hair. Rinse and repeat.

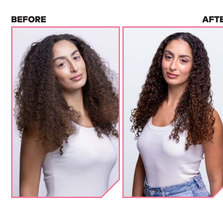

STEP 6

Apply **Glass Liquid Mask** on towel-dried hair and leave on 5 minutes. Rinse thoroughly.

STEP 7

Blow-dry the hair using a diffuser.

HAIR TYPE	STRAIGHTENER PASSES	STRAIGHTENER TEMPERATURE
Fine natural hair, bleached hair or with highlights	2	160°C / 180°C - 280°F / 320°F
Chemically colored hair	2	180°C / 200°C - 320°F / 370°F
Medium or coarse natural hair, resistant hair	2	200°C / 230°C - 400°F / 410°F

ON TONED HAIR, MIX PURE PURPLE AND KERA SMOOTING TREATMENT IN 1:10 RATIO

WARNINGS: Follow instructions for use carefully. Wear suitable gloves. Do not apply on irritated or damaged scalp. Avoid contact of the product with eyes and skin. Rinse eyes and skin immediately if product comes into contact with them. If any adverse reaction occurs, stop use immediately and seek medical assistance. For external use only. Keep out of reach of children.

LAMINATION

Duration: 1 wash
Service time: approximately 25 minutes

BEFORE AFTER

STEP 1

Cleanse the hair with the most suitable **Yellow Professional** shampoo depending on the hair type.

STEP 2

Apply **Glass Liquid Mask** on towel-dried hair.
Processing time: 5 minutes.

STEP 3

After brushing/blow-drying with a diffuser, pass the flat iron for straight hair or the curling iron for a curly look.

FOR MAINTENANCE

The Liss line for a smooth, frizz-free effect helps maintain the results of salon smoothing services.
Ideal for: Lumiplastia; Keratin Smooth Treatment; Anti-frizz Smooth Lamination.

Curls line helps hydrate and elasticize every curl type and eliminates frizz effect.
Ideal for: Anti-frizz Curly Lamination.

Q&A's

1. Can a color service be performed the same day as the use of Yellow Professional Kera Smoothing Cream?
Yes, it is possible to perform one of the Keratin services on the same day as a color service. After ironing, rinse and cleanse twice with shampoo. Dry completely and carry out the color service. Then cleanse and apply the most suitable mask depending on the Keratin service performed.

2. Can Yellow Professional Kera Smoothing Cream alter cosmetic color?
A texture service can cause cosmetic color to fade. We recommend adding Yellow Professional Pure Purple to Yellow Professional Kera Smoothing Cream in a 1:10 ratio to neutralize unwanted warm tones on blonde hair. Alternatively, after completing the service, apply one of Yellow Professional Pure Toners, Yellow Professional Color Mask, or Yellow Professional Color + Tone on Tone Creator depending on the technical need.

3. Can I perform Keratin service on bleached hair?
Yes, it is important to follow the recommendations for the temperature and number of passes of the flat iron for each Keratin service, and carefully evaluate the condition of the hair before proceeding. Applying Yellow Professional Kera Smoothing Cream on damaged hair is not recommended.

4. What is the straightening technology of Yellow Professional Kera Smoothing Cream?
Glyoxylic acid plays a fundamental role in reshaping the hair structure, for a long-lasting smooth effect without damaging the hair fiber. The formula is enriched with Hyaluronic Acid, which maintains hydration and protects the hair fiber, and Kera Nutri Complex, based on keratin, Murumuru butter, and Babassu oil, which care for the hair making it soft and silky.

5.Can I perform the treatment again at close intervals?
Yes, even though the longevity of the service is up to 4 months, the product can be used more frequently. Always evaluate the condition of the hair to avoid excessive damage.

6. In the Anti-frizz Curly Lamination service, can the flat iron pass alter the natural curl shape?
The flat iron is used to activate the product. To avoid altering the curl shape, do not perform more than 2 passes of the flat iron per section.

TECHNICAL CHART

ALFAPARF MILANO

PRODUCT RANGE

UP TO 4 MONTHS OF SMOOTH HAIR*

2x SHINE*

-34% ANTI-FRIZZ EFFECT*
